FULL LENGTH COURSES

CarriersEdge courses are designed to cater to all individual learning styles, including text, voice-overs, interactive activities, testing checkpoints, videos, animations and real-world scenario-based content. Courses can be paused with users returning to where they left off, also allowing for users to backtrack to review information as needed. System settings will also allow administrators to indicate if content can be skipped, or if the course must be completed in its entirety. Each module includes multiple tests, with both questions and answers randomizing for each instance. Some courses are available in Spanish as well as in English, as indicated in the list of modules. Full length modules range from 20 minutes to almost 3 hours.

- Accident Scene Reporting For Drivers
